

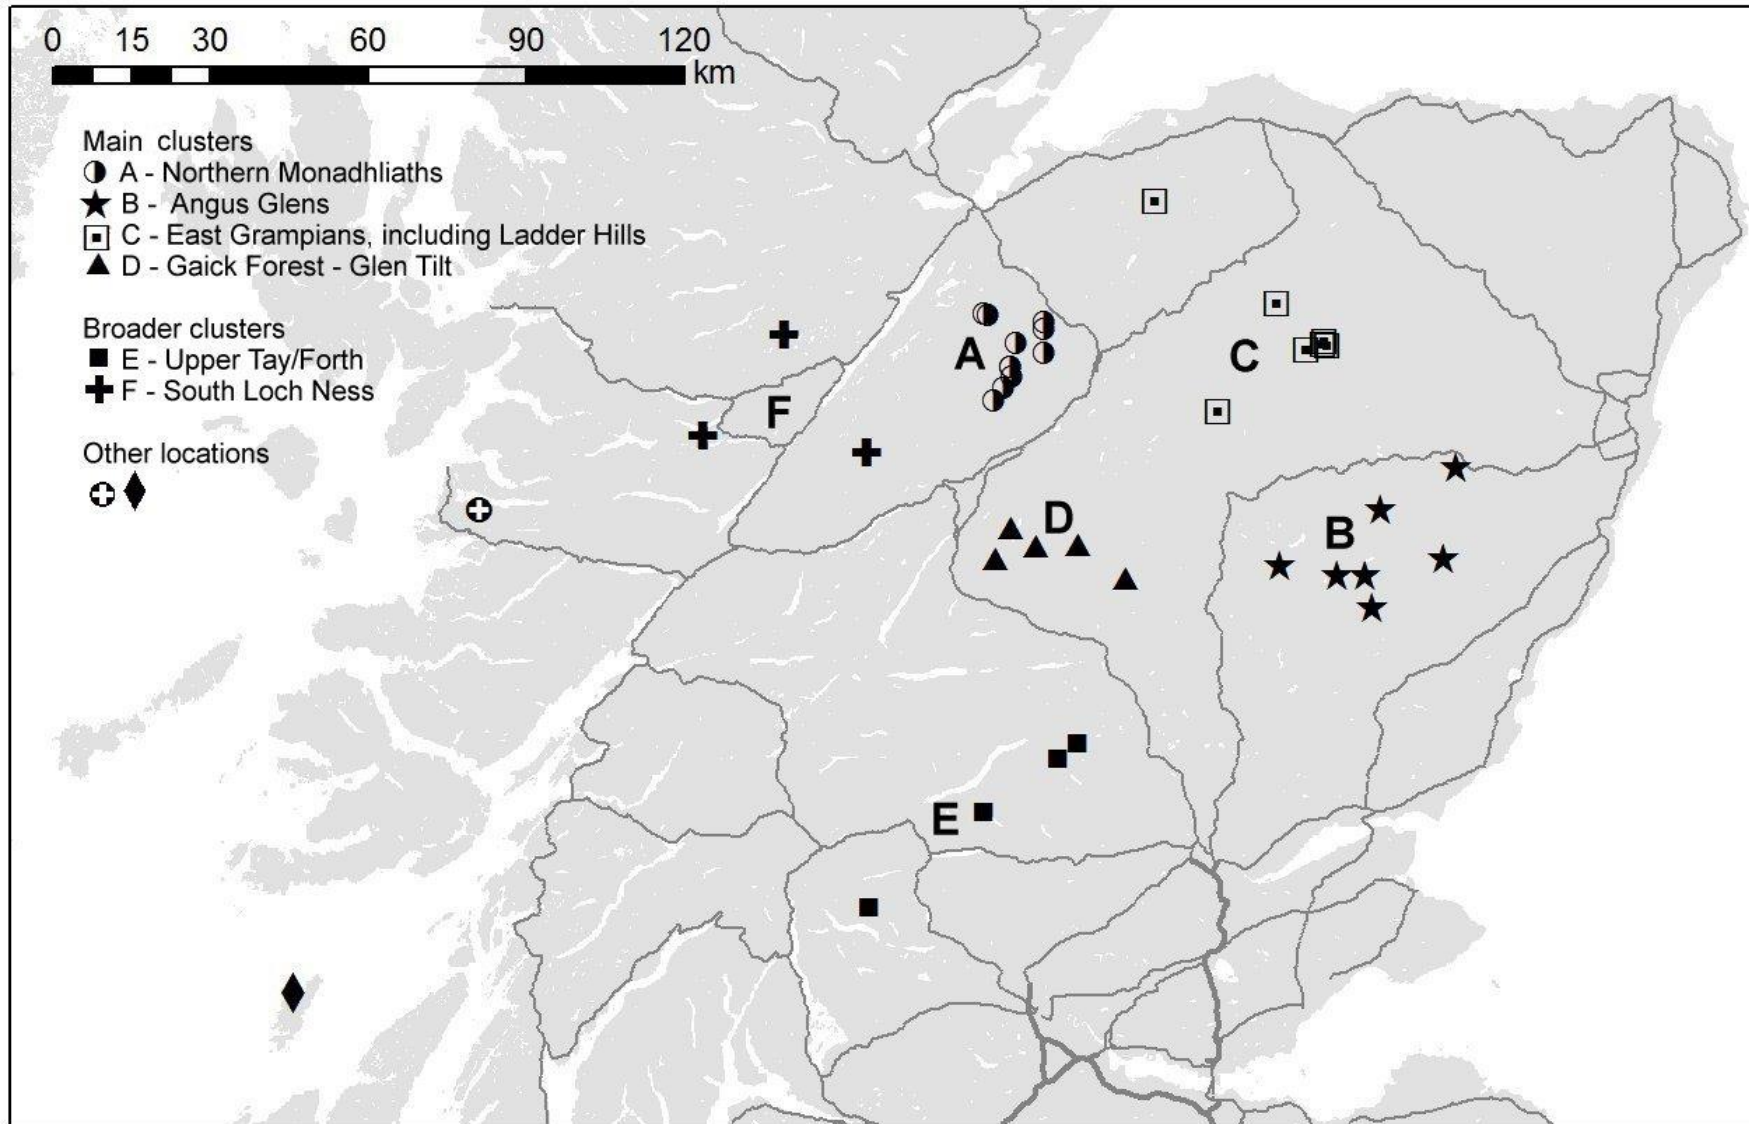

Map 1: Locations of potentially and known suspicious golden eagle satellite tag fates

Legend

The map shows:

- Four main clusters: A - Northern Monadhliaths (11 records); B - Angus Glens (7 records); C - East Grampians, including Ladder Hills (7 records); D - Gaick Forest - Glen Tilt (5 records).
- Two broader clusters: E - Upper Tay/Forth (4 records); and F - South Loch Ness (3 records).
- Two other locations.
- A-roads and motorways are shown as thin and thick grey lines.

Grid references for each last record are given in the attached table. The table contains 44 records, including 5 '80NS' stopped no malfunction records. As detailed in the report, the frequency of records and the spatial accuracy of these 80NS tags makes them unreliable for spatial analyses, and so only 39 of the 44 records are used in this analysis and included on the map.

No allegation is made connecting the last locations to the land holding where the signal ceased.
