2. A summary of our proposals	3
3. List of proposed changes	4
4. Providing feedback	13

Foreword

1

This consultation document sets out a number of proposals that will mean a significant overall benefit for passengers using Southeastern services, with shorter journey times and fewer gaps in service provision, allowing us to get our passengers to their destinations quicker.

It's important to note that these changes will not be as far-reaching as those we introduced in May 2018, which was a network-wide, comprehensive change to service pattern for the vast majority of our customers.

Our focus for May 2019 is to tidy up the timetable from this major change; bringing new services in to fill long gaps and reducing journey times by working with Network Rail to re-plan junction interactions with other services, giving many passengers an extra few minutes back every day.

Your feedback is important to us in how we finalise these changes and we are asking all stakeholders and passengers to provide their views not only on the proposals we have made here, but also more generally on how they feel the timetable could be improved. All feedback we receive is valued and considered when we assess timetable changes. Any feedback we are unable to consider for May 2019 will be re-evaluated for the following round of timetable changes in December 2019.

We're committed to open and transparent engagement with all our stakeholders and passengers and we look forward to hearing your views and working towards implementing improvements to our services next Spring.

David Statham

David Statham
Managing Director, Southeastern

A summary of our proposals

2

The first thing to note is that our proposed changes for May 2019 will not be as far-reaching or on the same scale as May 2018. Therefore, many users may notice that services from their local station(s) are unaffected.

The main outcome of our proposed changes will be a reduction of journey times for a significant number of our passengers, with an average reduction of 2 minutes as a result of the changes listed within this document. We are also seeking to resolve gaps in service at a couple of points on our network, ensuring a more regular service for users at these stations.

Our proposals affect train services starting at the following stations:

- Ramsgate
- Ashford International
- Dover Priory
- Canterbury West
- Orpington
- Maidstone East Line
- Broadstairs
- Victoria
- Bromley South
- Rochester
- Gillingham
- Barnehurst
- Dartford
- London St Pancras
- London Canon Street
- Slade Green
- Sevenoaks
- Gravesend

All stations along routes from these key stations to London will be affected by the proposed timetable changes. If your local station(s) are served by any of the train services listed within this document, then your journey will also be affected. In most cases your journey time will be reduced.

List of proposed changes

3

All services are weekday unless otherwise stated.

There are no changes to the calling pattern for the vast majority of services. Where the calling pattern has changed, this will be stated in the same row.

Ashford International

Departure time	Origin Station	Destination Station	Change in journey time / calling pattern
05.47	AFK	VIC	1 min reduction all stations to London

Providing Feedback

4

To provide your views on our timetable changes please fill out our [survey online](#).

We are seeking your feedback specifically on the proposals listed in this document, however we welcome feedback about the timetabling of all our services.

Where possible, we will endeavour to revise our proposals in consideration of the feedback we receive. Any feedback we are unable to take into account for May 2019 will be considered for the following round of timetable changes in December 2019.

The deadline for responses is 28th December.
