### Siemens wins top airport safety award

Siemens Logistics and Airport Solutions received the highest award for demonstrating outstanding health and safety performance at the recent Heathrow development safety award event. The safety award recognises the company's contribution and project delivery across all work streams at London Heathrow throughout 2012.

The awards ceremony was organised by Heathrow to recognise significant achievement in safety within the work environment. The event was open to all Contractors working on Capital Projects across the airport campus.

The award was presented to Paul King, Head of HSQE on behalf of Siemens by Heathrow's Chief Operating Officer, Normand Boivin. Paul King proudly stated that this prestigious award clearly recognises the company's proactive approach to health and safety that has enabled Siemens to deliver performance and service of the highest standard throughout 2012.

Heathrow Development Director, John Holland-Kaye stated that the standard of all submissions was extremely high and for Siemens to be honoured with the top award is a fantastic achievement for the business, a great credit to every individual involved and something they should all be extremely proud of.

In 2012, Siemens completed one million man hours worked without a reportable incident or lost time injury in almost 2 years. The company's innovative Zero Harm programme is central to the Siemens way of doing things – avoiding significant injury or loss – and individuals' positive attitude to safety habits also plays a significant part in embedding the right culture into the business.

In 2012, Siemens also opened its prestigious new UK Headquarters at No. 1 World Business Centre, Heathrow Airport, and the company won the Airport Operators Association Award for Best Service Provider 2012 for the performance of the Heathrow Terminal 4 (T4) project team.

**Siemens Logistics and Airport Solutions**

Siemens Logistics and Airport Solutions in the United Kingdom is headed by Dr. Andrew Robinson (Managing Director) and Steve Hayward (Finance Director). The company serves essentially two large groups of customers: airports/airlines and postal services. For airports and airlines, Siemens Logistics and Airport Solutions provides baggage and cargo handling lines. For postal, courier, express and parcel service providers, the company offers a range of letter and parcel sorting machines as well as address reading and coding solutions. The non-segment-specific software solutions as well as the comprehensive services provided by Siemens Logistics and Airport Solutions are equally attractive.
