Life is a rollercoaster for Surrey teachers and their pupils

Thorpe Park Resort recently opened its gates after hours to teachers from across Surrey where they were offered the opportunity to experience first-hand an exciting new suite of Key Stage 3/4 resources developed by Siemens - *Formula for Thrills*.

Formula for Thrills has been developed by Siemens in collaboration with Thorpe Park Resort and Ten Alps Communicate to put mathematical and scientific ideas in a variety of contexts based around a theme park and rollercoaster ride, helping to reflect the real world applications of maths and science.

The teachers had the opportunity to experience the resources first hand with a free CPD training session, plus an exciting behind-the-scenes tour of the park. Many of them commented how inspiring the resources were for linking maths and science to a real-world scenario and that they would be taking them back to share with colleagues and use in the classroom

Jack Du Pille, Education Manager at Thorpe Park Resort commented, "Collaborating with Siemens and Ten Alps Communicate on Formula for Thrills was a fantastic experience. We are thrilled with the fusion of useful curriculum based material and inspirational context provided an inspiring learning tool. Ten Alps were fantastic in proposing this vision and delivering the learning tools. The execution of the event was flawless and we left some teachers re-inspired and enthusiastic for delivering engaging STEM based lessons."

Formula for Thrills is the latest interactive resource forming part of a wide range of educational resources, supporting and encouraging progression in STEM based subjects and skills for ages 7 years upwards. The full, extensive selection of resources can be found and downloaded for free at siemens.co.uk/education.

Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 165 years. The company is active in more than 200 countries, focusing on the areas of electrification, automation and digitalization. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is No. 1 in offshore wind turbine construction, a leading supplier of combined cycle turbines for power generation, a major provider of power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. The company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal year 2014, which ended on September 30, 2014, Siemens generated revenue from continuing operations of €71.9 billion and net income of €5.5 billion. At the end of September 2014, the company had around 357,000 employees worldwide. Further information is available on the Internet at www.siemens.com.
