### **Siemens wins new order with Fred. Olsen Renewables in Scotland**

**Siemens has signed a contract for the supply of 25 wind turbines for Mid Hill Wind Farm in Scotland. Siemens will also provide a five-year Service and Availability agreement.**

The wind farm is located at Fetteresso near Stonehaven, Aberdeenshire and will consist of 25 x SWT-2.3-93 turbines, of which 20 will have a 125m tip height and the others 100m. Once completed it will provide green energy for more than 30,000 homes and contribute to the local economy and employment.

Nick Emery, chief executive officer of Fred. Olsen Renewables said: "Mid Hill is the latest project we will be developing utilising Siemens wind turbines in Scotland. The farm adds to our current portfolio of 315 UK onshore wind farms, taking our overall generating capacity in the UK to 414MW by 2014. We are pleased to continue in contributing to the Scottish Government's focus on renewable energy."

Nick Ward, head of onshore sales for Siemens Wind Power in the UK said: "We are delighted to have won this new order for Mid Hill, which is the second order we have received from Fred. Olsen Renewables in the UK. The new development underlines the importance of renewables for Scotland and the benefits to the community of green energy and local job creation."

The turbines are due for installation in August 2013.

**About Fred. Olsen Renewables**

Fred. Olsen Renewables (FOR) has been developing and operating wind farms since the mid 1990's showing real commitment to the Scottish and UK renewable energy generation market. Its UK operational portfolio comprises Rothes (51MW), Pauls Hill (64MW) and Crystal Rig (200MW) giving a generating capacity of 315MW. Projects currently under construction are Mid Hill (57,5MW), and Rothes II (41MW)). The company is also active in Norway and Sweden where it has over 72MW in operation. FOR is a wholly owned subsidiary of Bonheur ASA and Ganger Rolf ASA, both listed on the Oslo Stock Exchange, with FOR being responsible for the development of renewable energy generation activities. See [www.fredolsen-renewables.com](http://www.fredolsen-renewables.com) for more information.
