Siemens ITS welcomes new Managing Director

Siemens has announced the appointment of Wilke Reints as the company's new Managing Director for the Intelligent Traffic Systems (ITS) business in the UK to succeed Tom MacMorran who retires at the end of this month.

Wilke Reints (pictured) is a familiar figure in this area of the business having spent over 20 years with Siemens. He first joined the company in 1992 moving to the ITS business 3 years later and since that time has held a variety of positions. This included working in project management for the Athens Olympic Games as well as other large traffic management-related projects.

Following a 2-year break from Siemens mid career, Wilke re-joined the company in 2010. Most recently, he has held a global position responsible for all research and development, and product lifecycle management for ITS.

Wilke said: 'Siemens has a proven track record with a global pedigree for the efficient installation, operation and maintenance of ITS solutions. I am confident that we will continue to combine experience with reliability, foresight and innovation to deliver the highest level expertise and service to meet the needs of our customers in the UK'.

Siemens was established in the United Kingdom more than 170 years ago and now employs 15,000 people in the UK. As the world's largest engineering company, Siemens provides innovative solutions to help tackle the world's major challenges. Siemens has offices and factories throughout the UK, with its headquarters in Frimley, Surrey.

About Siemens

Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for 170 years. The company is active around the globe, focusing on the areas of electrification, automation and digitalization. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is a leading supplier of efficient power generation and power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. The company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal 2017, which ended on September 30, 2017, Siemens generated revenue of €83.0 billion and net income of €6.2 billion. At the end of September 2017, the company had around 377,000 employees worldwide. Further information is available on the Internet at www.siemens.com
