## Siemens is a Top Graduate Employer

**Siemens has been named as one of the UK's leading graduate recruiters and is one of the top climbers at number 56 in The Times Top 100 Graduate Employers 2017/18.**

The rankings have been compiled from research with over 19,000 final year students from thirty top universities, who were interviewed by High Fliers Research for The UK Graduate Careers Survey. Finalists were asked the open-ended question 'Which employer do you think offers the best opportunities for graduates?'

The result represents Siemens highest ever placing in the rankings and is a climb of 27 places from last year. Siemens continues to invest heavily in UK graduate engagement and recruitment and runs a UK-wide university engagement programme, which includes engaging future talents at careers fairs, and through innovative gaming experiences and competitions, and offers a wealth of opportunities, from UK and international graduate schemes, to year-long placements and summer internships. By establishing these links with universities Siemens hopes to give valuable opportunities to young people from across the UK, increasing their employability and skill base, as well as gaining great input into the ongoing development of Siemens in the UK.

Rachel Wilson, Head of Talent Acquisition in the UK said "Achieving this position in the Times Top 100 Graduate Employers is tremendous news and a clear indication that there is a growing interest in joining a global engineering company that creates technologies that build our society and our future. At Siemens, we're not just engineers but we're scientists, mechanics, computer geniuses, designers, and sales professionals, to name but a few, who are creating the future every day. Anyone who is interested in finding out how they can become a future maker with Siemens, can discover more about our opportunities at [www.siemens.co.uk/careers](http://www.siemens.co.uk/careers)."

**About Siemens**

Siemens AG (Berlin and Munich) is a global technology powerhouse that has stood for engineering excellence, innovation, quality, reliability and internationality for more than 170 years. The company is active in more than 200 countries, focusing on the areas of electrification, automation and digitalization. One of the world's largest producers of energy-efficient, resource-saving technologies, Siemens is a leading supplier of efficient power generation and power transmission solutions and a pioneer in infrastructure solutions as well as automation, drive and software solutions for industry. The company is also a leading provider of medical imaging equipment – such as computed tomography and magnetic resonance imaging systems – and a leader in laboratory diagnostics as well as clinical IT. In fiscal 2016, which ended on September 30, 2016, Siemens generated revenue of €79.6 billion and net income of €5.6 billion. At the end of September 2016, the company had around 351,000 employees worldwide. Further information is available on the Internet at [www.siemens.com](http://www.siemens.com).
