

Commercial drivers please take care

In the last five years there were 6 collisions and 149 near misses involving commercial vehicles at level crossings. So please take care and stay alert.

When amber lights show at road level crossings this means **STOP**.

It's tempting to jump the lights or race around the barriers, but not only is it putting your life at risk, it's breaking the law. **Remain stationary until all the warnings stop and all barriers are lifted.**

Don't assume there is only one train passing through or use previous experience to guess when the train is coming. **Trains can come from either direction at any time.**

It's easy to get distracted, especially by phones, music and navigation systems. **Approach crossings with caution and stay alert.**

Level crossings are not gritted, even in icy conditions. **Be extra cautious throughout the winter period.**

Network Rail cares about your safety. To find out more, go to [networkrail.co.uk/levelcrossings](https://www.networkrail.co.uk/levelcrossings)
