

Fixed penalty notices issued under COVID-19 emergency health regulations by police forces in England and Wales

Introduction

This release presents the latest data on the police use of COVID-19 enforcement notices issued under all emergency health protection regulations in force as at 20th June 2021¹ (and includes revisions to previously published figures).

Data on FPNs issued in England and Wales is collated centrally by the ACRO Criminal Records Office and cover the 43 territorial forces, the British Transport Police (BTP) and Ministry of Defence Police.

The figures below relate to enforcement activity by police forces and these data should be seen in the context of wider police activity to engage with the public to explain and encourage compliance with the new regulations. As outlined in previous releases, the police have recorded hundreds of thousands of Covid-19 related incidents since the 27th March 2020. This will include incidents where officers have proactively offered advice to people, responded to reports from the members of the public about breaches of the regulation by others and offences where criminals have sought to take advantage of the pandemic to commit a crime.

Headline figures for FPNs issued under the Health Protection (Coronavirus, Restrictions) Regulations, England and Wales

Chart 1 shows previously published figures for earlier reporting periods together with the latest revisions as more FPNs have been processed. In earlier releases this was reported on a daily basis but, given the length of time these regulations have been in place, this is now summarised on a weekly basis. The following analysis and the chart below do not include fines issued under the face covering regulations, business regulations or ITRs issued in England. Separate analysis is presented in the sections below for these FPN types.

Since the peak in early February, enforcement levels have steadily declined. This coincides with restrictions easing in the months following March 2021 as part of the roadmap out of lockdown. This downward trend has continued in the latest figures with 11 FPNs having been issued in the last full week (11th - 17th June 2021), compared with 18 FPNs in the previous week. Enforcement levels are now similar to those seen in July and August 2020 when national restrictions were relaxed, and an average of 19 FPNs were issued weekly (31st July – 27th August 2020). The chart shows that these figures are likely to be revised upwards as more fines are processed.

There were steep rises in the number of FPNs issued following the week of 18th-24th December 2020, coinciding with the introduction of Tier 4 as part of the “Local COVID-19 Alert Levels” regulations. This upward trend continued following the introduction of the new national restrictions on the 6th of January 2021 (when all areas of England were moved into Tier 4). This reflected more proactive policing of the regulations in the context of the danger to public health and represented a shift to move more quickly to enforcement where there were clear breaches of the law.

Enforcement levels during January and early February 2021 returned to levels seen in March and April 2020, when restrictions were first introduced with a peak of 3,294 FPNs issued between 10th – 16th April 2020 (during the week of the Easter Bank holiday). Enforcement levels have continued to decline from March 2021 to June 2021 as restrictions have eased and activity that led to the most common reasons for the issuing of FPNs (gatherings of two or more people) no-longer prohibited under the current restrictions.

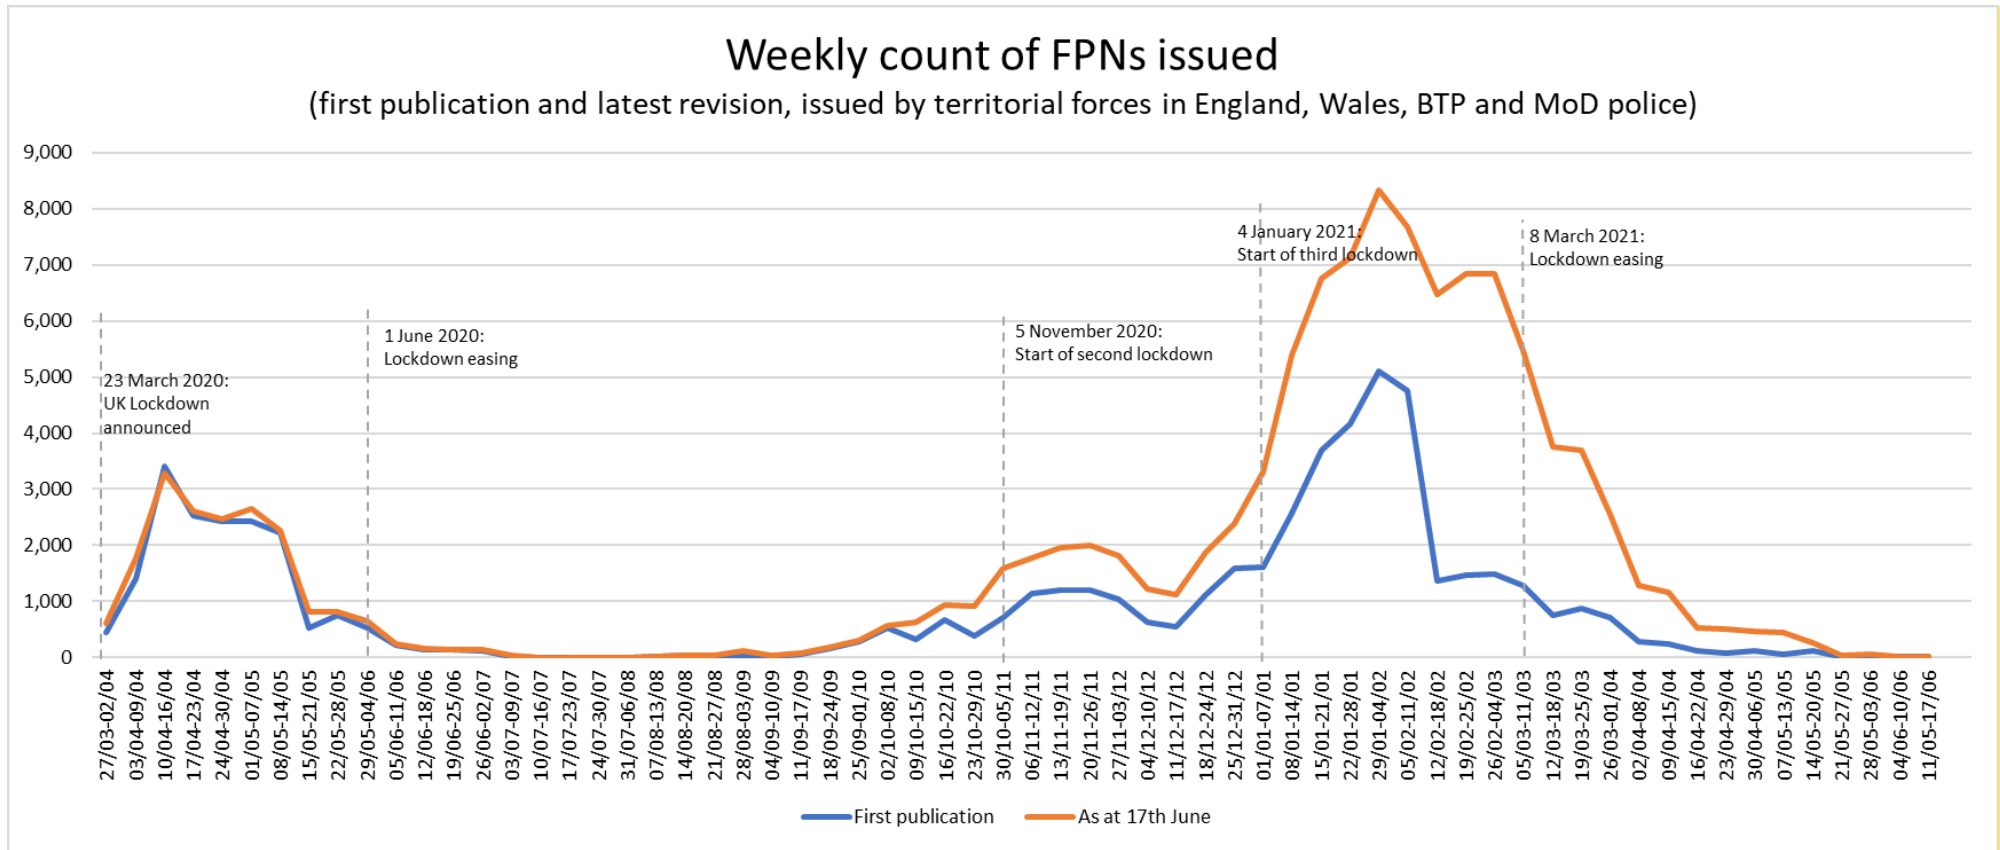

Of all enforcement notices issued in England and Wales:

- The most common reason for which an FPN was issued in England was a “Contravene a requirement to not participate in a gathering in the Tier 4 area of two or more people - private dwelling/any indoor space” , with 31,516 FPNs, and similarly the most common reason in Wales was “Contravene requirement to not participate in a gathering in private” with 3,814 FPNs issued for this reason (Table 1).
- The large majority (7 in 10) were issued to males (Table 2).

- 75% were issued to the under 35s; with 47% issued to 18-24-year olds, 16% to those aged 25-29 and 12% to those aged 30-34 (Table 3).
- Of those FPNs where the individual issued with the notice had a self-identified ethnicity³ recorded, 76% were issued to people who self-identified as White. 12% went to those who self-identified as Asian and 7% to those identifying as Black (Table 4).

³ 21% of FPNs issued did not have the self-defined ethnicity of the individual identified.

Chart 1: FPNs issued under COVID-19 regulations (excluding face coverings, businesses and ITR), between 27th March 2020 and the last full week ending 17th June 2021

Note: excludes 3 FPNs with incorrect date of issue.

Understanding the data

These data cover the number of FPNs issued under COVID-19 regulations which came into effect from 27th March 2020.

Data presented in this release represent the number of FPNs issued. While the vast majority of FPNs relate to a single individual, some people have been issued with an FPN more than once. An FPN can be issued for more than one reason.

Figures on the number of FPNs issued should not be seen as a measure of the amount of police activity involved in policing the new measures, or the level of public non-compliance, since fines are issued as a last resort after initial attempts to engage with the public to explain and encourage compliance with the new regulations have not been successful.

Owing to the time taken to process FPNs, figures presented here are likely to underestimate the volume of FPNs issued each day and will be updated with each release as new data are received, although the rate of increase in revised data has slowed significantly.

The nature of the administrative process involved in issuing an FPN is such that there is sometimes missing data or discrepancies when data are returned. For example, as ethnicity is self-defining this is not always completed, and the level of missing data needs to be considered when interpreting such figures.

Force level figures are presented for England in Annex A and Wales in Annex B. However, caution should be taken when making comparisons between forces as variation in is likely to reflect a range of factors including how the force has decided to police non-compliance as well as differences in local context (e.g. composition and density of the local population).
